Sustav uredskog namještaja SKALALA

Glavni koncept sustava uredskog namještaja **SKALALA*** su oblikovane funkcionalne ljestve / nosači na koje se „kvače“ svi ostali elementi – radne ploče stolova, police, ormari, ladičari i sl.

Ovjes se izvodi pomoću posebno izrađenih limenih (metalnih) držača koji se pričvršćuju s donje strane svakog elementa i kvače na horizontalne prečke na ljestvama.

Nosači su izrađeni od masivnog drva ili metalnih cijevi poprečnog kvadratnog presjeka (cca 35x35 mm) u tri visine: 220 cm, 150 cm i 75 cm .

Sustav **SKALALA** omogućava da se osim osnovnog ovjesa na nosače (ljestve), u okvire dodatno ugrađuju ojašani paneli od tkanine ili perforirane furniske ploče za ovjes dodatnog pribora, garderobe, ploča za pisanje, biljaka i sl.

KONCEPT / ASOCIJACIJE // ZAHTJEVI

- drveni ili metalni okvir „ljestve“ na koji se modularno kvače svi elementi sustava.
- modularno, fleksibilno, lagano za montažu, pomično
- timski rad / pojedinačni rad
- korisnik odabire elemente i ima mogućnosti slaganja prema vlastitim potrebama
- fleksibilna izmjena vizualnog identiteta ureda prema želji korisnika – zelenilo, high-tech, metal-drvo...što se postiže materijalima (drvo-metal) i bojama/površinskom obradom i dekorima.
